Replication Data For: Linking Knowledge with Action when Engagement is Out of Reach

Alan Zarychta, Ph.D., University of Chicago, azarychta@uchicago.edu

Roger Emmelhainz, Ph.D., University of Colorado Boulder, roger.emmelhainz@colorado.edu

Tara Grillos, Ph.D., Purdue University, tgrillos@purdue.edu

Krister Andersson, Ph.D., University of Colorado Boulder, krister.andersson@colorado.edu

Codebook for “honduras.txt”

Variable	Definition	Value and Labels
age	Respondent’s age	
cargo_manager	Respondent job type: manager	Binary: 1 = respondent identified their role as either “Director/Gerente”, “Enfermero(a) profesional”, or “Personal administrativo”
cargo_provider	Respondent job type: provider (i.e., frontline health worker)	Binary: 1 = respondent identified their role as either “Enfermero(a) auxiliar”, “Medico(a)”, “Promotor(a)”, “Tecnico(a)”, “Personal de apoyo”, or “Otro”
creible	Credibility: respondents’ perception of the information’s credibility (degree to which they believe it)	0-100 scale from “poco creible” to “muy creible”
decentralized	Administration structure in respondent’s municipio	Binary: 1 = decentralized administration following the 2008 reforms 0 = centralized administration (i.e., still administered directly by the national Ministry of Health)
dep_atlantida dep_choluteca dep_colon dep_comayagua dep_coban dep_cortez	Departamento (state) in which respondent primarily works	Binaries: for each variable, 1 = respondent works in the indicated Departamento

dep_elparaiso dep_franmorazan dep_graciasdios dep_intibuca dep_islasbahia dep_lapaz dep_lempira dep_ocotepeque dep_olancho dep_santabarbara dep_valle dep_yoro		
educ	Highest level of formal education completed	5-point scale: 0 = “Ninguno” (none of these) 1 = “Escuela secundaria” (high school) 2 = “Bachiller tecnico, bachillerato, o profesion (no universidad)” (post-secondary credentials, but less than a 4-year degree) 3 = “Universidad” (4-year undergraduate degree) 4 = “Posgrado” (graduate degree)
female	Respondent’s self-identified sex	Binary: 1 = “mujer” (female)
format_narr	Format treatment	Binary: 1 = viewed a Narrative version of the letter
format_quant	Format treatment	Binary: 1 = viewed a Quantitative version of the letter
leg_female	Product of the <i>female</i> and <i>legitima</i> variables (only used to simplify code)	
legitima	Legitimacy: respondents’	0-100 scale from “poco

	perception of the information's legitimacy (whether it is provided with the best interests of the community in mind)	legitima" to "muy legitima"
mediorder	Question order randomization to prevent order effects: the order in which the mediators (<i>relevante</i> , <i>creible</i> , and <i>legitima</i>) were measured.	C1 = "relevante" C2 = "creible" C3 = "legitima" Variable contains all six possible permutations, e.g., "C2 C3 C1"
outcomeorder	Question order randomization to prevent order effects: whether the outcome (<i>probable</i>) or the mediators (<i>relevante</i> , <i>creible</i> , and <i>legitima</i>) were measured first	"Mediators Outcome" = mediators first "Outcome Mediators" = outcome first
probable	Intention to Act: respondents' self-reported probability that they will use the information to make decisions	0-100 scale from "poco probable" to "muy probable"
rel_cre_leg	Product of the <i>relevante</i> , <i>creible</i> , and <i>legitima</i> variables (only used to simply code)	
relevante	Salience: respondents' perception of the information's salience (relevance/usefulness to them)	0-100 scale from "poco relevante" to "muy relevante"
source_alc	Sender treatment	Binary: 1 = viewed an Alcaldia version of the letter
source_moh	Sender treatment	Binary: 1 = viewed a Ministry of Health version of the letter
tandiferente	Novelty: respondents perception of the degree to which the strategy presented differs from their traditional strategies	0-100 scale from "poco diferente" to "muy diferente"
treat_alc_narr	Combined treatment	Binary: 1 = viewed the Narrative version attributed to

		their Alcaldia
treat_alc_quant	Combined treatment	Binary: 1 = viewed the Quantitative version attributed to their Alcaldia
treat_moh_narr	Combined treatment	Binary: 1 = viewed the Narrative version attributed to the Ministry of Health
treat_moh_quant	Combined treatment	Binary: 1 = viewed the Quantitative version attributed to the Ministry of Health
workadolescents	Frequency with which respondent reports working with adolescents, or working on issues affecting adolescents	5-point scale: 0 = “Nunca” (never) 1 = “A veces” (sometimes) 2 = “La mitad de tiempo” (half the time) 3 = “La mayoría del tiempo” (most of the time) 4 = “Siempre” (all the time)
YrsSalud	Number of years respondent has worked in the health sector
